

Energy Committee

8/25/2010

Present:

Amy Russell, Chair, Nate Abbott

Members of the Capital Improvements Building Committee: Israel Willard, Tom Scribner, Marty Marindale, Tom Dalton

Amy Russell called the meeting to order at 6:00PM.

Capital Improvement Building Committee

Discussion regarding the recommendations of the energy committee to the selectmen for the Academy Building, the Public Safety Building and other town buildings.

We discussed the general audits of the other buildings as well.

The Energy committee agreed that they would forward a copy of the energy audit for the Building Committee to review, if the building committee could not acquire a paper copy in the Town offices.

Specific questions were asked about the PSB roof venting, furnace mezzanine configuration, and the use of metal door frames. We agreed that without the plans, this discussion could not be concluded. The energy committee believes that we planned a visit to the PSB to review energy features after construction is finished.

The meeting was adjourned at 7:20PM

Minutes approved 9/29/2010

Nathaniel Abbott, Clerk
