

August was a busy month at the Highway Dept. with the rain finally subsiding in July. Approximately 10-15 inches of rain fell depending on the location in town. Road grading, and fixing washouts were a main priority, as well as continued support at the Transfer Station providing both equipment and man power. Completion of crack sealing will be taking place the week of 8/25. We would also like to take a moment to congratulate Road Agent Paul Perkins, Foreman Travis Mitchell, Equipment Operator John Skehan, and Laborer Austin Simonds who all received their Principle Operator Licenses For the Transfer Station, as well As Alexander DeCoste who also received his Principle Operator License, and transitioned to Foreman at the Transfer Station. With that, thank you for the continued support, and patience.

*Finished Road After Pulling Ditches And final grading*
